

**art photonics**  
broad spectra fiber solutions

# UNIQUE FIBER PROBES FOR MEDICAL DIAGNOSTICS IN 0.3-16 $\mu\text{m}$ SPECTRAL RANGE

**FIBER PROBES  
COMPATIBLE  
WITH ANY  
SPECTROMETER**

*FlexiSpec*<sup>®</sup> fiber probes help to analyze biotissues & bioliquids *in-vivo* – using key spectroscopy methods: ATR-absorption, diffuse NIR-reflection, fluorescence and Raman. The best method or their combination enables to run label free medical diagnostics with high specificity, sensitivity & accuracy for tumor margin detection, etc.
